# Cooki

● ● ●

Aurangzeb Malik, Graham Gier, Sam Goulding, James Le, Allen Fu, Zhaoyi Xie

What is it?

- Cooki is a website that teaches users the basics of cooking with recipes and video tutorials

Features

- ## User Account
  - Login: Allows user to login
  - Register: Allows user to create an account
  - Favorites: Displays users favorite recipes
- ## Search Tool
 - Simple search tool matching recipes by name

Features

- Recipe Page
  - Basic template for every recipe on website
  - Recipe instructions
  - Includes comment section and video tutorial

Project Management Method

- Agile Method
  - Begin in broad direction
  - Adapt to conditions
  - Complete project in small sections/iterations
  - Rank: 5
  - Working in small iterations allowed us to make necessary changes without compromising the project

Slack

- Communication Method
  - Rank: 5
 - Easy to communicate, and share tutorials.

Tools

- Asana
  - Project Tracking
  - Ranking: 3.3
  - Did not use often but was very helpful with organizing and tracking work

Tools

- Github
  - VCS Repository
  - Rank: 5
  - Extremely easy to commit and pull files

Tools

- Command Line
  - NodeJS/Atom
  - PgAdmin 4
  - Rank: 5
  - Testing locally before deployment

Tools

- Heroku
    - Deployment environment
    - Rank: 4
    - Easy to work with but database had to go through maintenance

Challenges We Encountered

- Coordinating push/pulls with teammates
- Keeping design consistent
- Using Heroku before being taught in lab
- Maintaining version consistency
- Using passportjs (bad documentation)
- Bcrypt breaking (several times)
